Profile

Defending everything from enterprise networks to intelligent machines.

Cyber security engineer and AI researcher working at the intersection of security operations and adversarial machine learning. First Class BSc (Hons) in Computer Security and current MSc Artificial Intelligence candidate at the University of Plymouth, with industry experience spanning enterprise SOC operations, ISO/IEC 27001:2022 implementation, and vulnerability management in insurance and telecoms. Research focus: hardening deep-learning intrusion detection systems against the attacks designed to fool them. Seeking PhD positions and research-driven engineering roles in AI security.

Research

Adversarial Training to Improve Deep-Learning Intrusion Detection in the Internet of Vehicles

MSc Dissertation (PROJ518) · University of Plymouth · Supervisor: Dr. Shaymaa Al-Juboori · In progress, 2026

- Investigating whether adversarial-attack techniques can be repurposed as a data-augmentation strategy, enabling deep models to outperform lightweight baselines on strictly de-duplicated, realistic forensic data.
- Training a 1D-CNN on the CICIoV2024 CAN-bus dataset against a Random Forest baseline; attacking both with FGSM and PGD adversarial examples via the Adversarial Robustness Toolbox (ART).
- Evaluating a Multi-Strategy Adversarial Training regime across attack budgets on clean accuracy, adversarial accuracy, false-positive rate, and computational cost.
- Contributes a reproducible evaluation pipeline for adversarially robust IDS on automotive CAN traffic; code and findings to be open-sourced and submitted to peer-reviewed venues.

Education

MSc Artificial Intelligence 2025 – Present

University of Plymouth, UK · Dissertation in adversarial ML for vehicular intrusion detection

BSc (Hons) Computer Security — First Class Honours 2021 – 2024

University of Plymouth, UK

Experience

Cyber Security Engineer — Executive

Union Assurance PLC · Sri Lanka · Nov 2024 – May 2025

- Led ISO/IEC 27001:2022 policy and procedure creation across a leading Sri Lankan insurer.
- Led VAPT operations and triaged SOC alerts, accelerating incident response.
- Strengthened enterprise cloud security by embedding ISO/IEC 27001:2022 controls, reducing audit findings and improving compliance visibility.
- Partnered with vendors to align advanced security tooling with business needs.

Associate Engineer (promoted from Trainee Associate Engineer)

Lanka Communication Services (LankaCom) · Sri Lanka · Feb 2024 – Nov 2024

- Supported ISO/IEC 27001:2022 ISMS implementation and documentation at Sri Lanka's first ISP, contributing to the organisation's successful certification.
- Diagnosed ISP backbone and VPN issues to ensure continuous uptime for banks and enterprise customers.
- Operated in a 24/7 NOC, maintaining SLA compliance; managed DCIM data-centre monitoring systems.

Technology Intern

AXYYA Digital · Sri Lanka · Jul 2022 – Oct 2022

- Conducted technical research and documentation across assigned projects.
- Served as intern group leader from September 2022, coordinating tasks across the team.

Selected Projects

AdverSec — adversarially robust intrusion detection · 2025

Python · PyTorch · scikit-learn · Adversarial Robustness Toolbox

- Hardening neural IDS against FGSM and PGD attacks on the CAN bus; foundation of the MSc dissertation.

NetEAGLE — network security gateway · 2024

Python · Flask · Suricata · Raspberry Pi

- Raspberry Pi security gateway with IDS/IDPS and a mobile control plane for home and small-office networks.

yulan.me, The Meridian & Rampe — publishing platforms · 2025–2026

Next.js · TypeScript · Notion API · Cloudflare Pages

- Notion-backed portfolio and static-site archives, built and operated end to end.

Skills

Security	Network security · IDS/IPS (Suricata) · Vulnerability management & VAPT · Incident response · SIEM · ISO/IEC 27001 · Linux firewalls (UFW) · Nmap · Wireshark
Machine learning	Deep learning (CNN, RNN, LSTM) · Adversarial ML · Adversarial Robustness Toolbox (ART) · PyTorch · TensorFlow/Keras · scikit-learn
Engineering	Python · Bash/Shell · Linux administration · Raspberry Pi & embedded Linux · Flask · Cloudflare (Pages, DNS) · Notion API · Technical writing & documentation

Certifications

Certified in Cybersecurity (CC)	ISC ² · 2024
ISO/IEC 27001:2022 Information Security Associate	SkillFront · 2024
AI Security Fundamentals	Microsoft · 2026
AI Security & Governance	Securiti · 2026
Introduction to Cybersecurity	Cisco Networking Academy · 2021
